The OSHA 5600: Disaster Site Worker Train-the-Trainer prepares experienced trainers to present OSHA's 16-hour Disaster Site Worker Course. The Disaster Site Worker Train-the-Trainer Course prepares experienced trainers to present OSHA's 16-hour Disaster Site Worker Course. Trainers for this course need to be able to apply the elements of successful adult training programs, along with specific knowledge, skills, and attitudes to awareness training about safety and health hazards at natural and man-made disaster sites.

Trainers are given the opportunity to practice knowledge, skills, and attitudes through discussion, planned exercises, demonstrations and presentations. Participants receive lesson plans and training materials for the Disaster Site Worker Course as well as information on training techniques and resources. Trainers will be expected to present a selected portion of the Disaster Site Worker Course and to use a "presentation evaluation" sheet to evaluate other presenters.
